HUMIC Liquid - TDS

100% soluble

20 % conc. Humic Acid

analysis by CDFA method

HUMIC Liquid

Batch number : 200217
Production Date : 20-02-2017
Expiry date : 20-02-2019

Typical analyses

Water solubility	100%
Humates/fulvates	20%
Total Humic acids	3%
Total Fulvic acids	17%
Total Nitrogen	5%
Total Organic Carbon	11%
Dissolved Organic Carbon	11%

Available units

25 ltr cans
200 ltr drums
1000 ltr IBC

Physical properties

Colour	Black
pH	8.1
Form	Liquid
Density	1.1

Source

100% Soluble HUMIC Liquid is a concentrated soil conditioner available in 20% (wt/vol) concentrations of Soluble Humic and Fulvic Acid. HUMIC Liquid is formulated from plant derived natural deposits of the best peat layers and filtered from high quality drinking water. The highest quality standards apply.

Unique partical size

HUMIC Liquid dissolves rapidly in water (100% soluble) and so it will not block your filters. Suitable for all irrigation and fertigation systems.
