

Triferto Fertilizer

Export

Triferto

Organisation, 100% privately owned

Triferto

This is what we do

Triferto is a privately owned international wholesaler of fertilizers. With a network of warehouses and a splendid logistical organisation, Triferto ensures the delivery of fertilisers across Europe and selected overseas markets, through resellers to the farmers.

Function of Triferto for customer and suppliers is building a long term partnership between suppliers and farmers by:

- Financing
- Warehousing
- Value adding
- Market consulting
- Agronomic advice and optimisation

Gert-Jan de Groot
Managing Director, CEO

Triferto

Our team

Our 75 staff face daily serving our customers, world wide.

Rüdiger Simon
(Executive Vice President)

Triferto

Sales operations export

- Total sales 750 Kt, turnover 225 million (€)
- Sales in more than 55 countries world wide
- 75 staff, 14 representatives, 2 agronomists
- 70 suppliers, 500 articles

"We can fully support your local fertilizer business with efficient concepts, logistic service and agronomic knowledge."

Raphaël de Rijcke

(Vice President Export)

Triferto

Research and development

- Development of new building blocks for blends.
- Develop tailor made complex fertilizers and blends.
- Development of private label packaging.
- Field trials in different crops and different soils.
- Investigate warehousing properties of fertilizers.
- Examine and improve spreading properties of fertilizers.

Ronald van Hal (R&D, Marketing Manager)

Agronomic know-how, the right granule in the right place.

Triferto

Warehousing. accessible by vessel

"210.000 ton full service warehouse capacity"

Jan de Boer - Logistics manager

Europe

 Warehouses

Triferto

Packaging.

- 10 Big Bag filling lines (500 / 600 / 1.000 / 1.200 kg)
- 4 bagging lines for all bag sizes and types, such as WPP/PE and PE bags
- Palletizing
- Customized packaging possible

Logistics

Full service document support

- Transport of fertilizers, solid and liquid
- Seafreight container
- Break bulk (seafreight)
- Loading of barges and vessels
- Truck transport
- Full support in export documents
- Financial logistics

Product range

Commodity fertilizer range

We offer a complete line of products, geared at every crop and type of soil that is delivered worldwide.

Nitrogen:

CAN, Urea, AS 21% Standard, AS granular, ASN 26 + 33% SO₃

Phosphate:

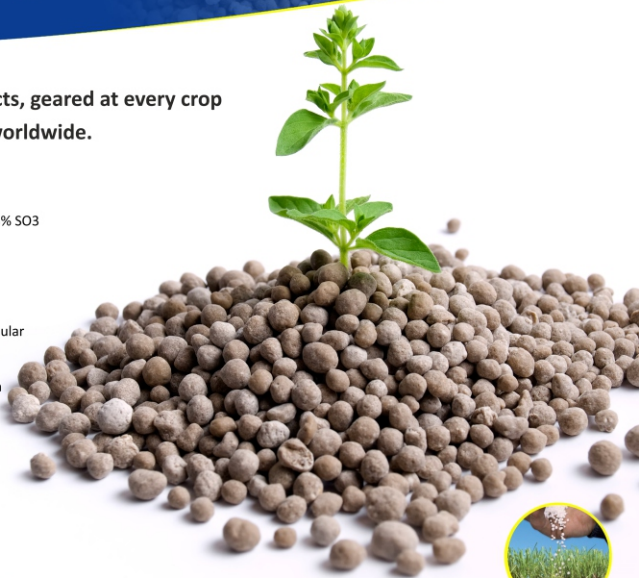

Rock Phosphate, DAP, MAP, TSP, SSP

Potassium:

MOP standard, MOP granular, SOP standard, SOP granular

Others:

Kieserite, Mg Oxide, NPK 15-15-15, NPK 15-5-20 green
NPK 12-12-17 Blue (SOP), NPK 12-24-12

Triferto

Advanced fertilizers

- Exclusive additives from Triferto
- Branded by Triferto
- Tested under supervision of Triferto

N Stabilizer

Reduce N-leaching
and volatilisation

Blend concepts
including trace
elements

SOLFERTO

Water soluble
fertilizers

NOVU-K FERTILIZER

Four nutrients in one go
K, Ca, Mg, SO₃

GRANU LIME

Sustainable soil
conditioner

HUMIC

Humic Acids, increase
P- availability

Organic BOOST fertilizer

Organic chicken
manure

"With our knowledge we can help your local farmer to grow better crops and bring higher quality products to consumers."

Heico van Griethuysen

Triferto

Quality Blends concepts

Novagran - Equipped with 12 Blend Units

Fertilizing is customisation. Not just for each plant but also perhaps for application method or climate type. You want to apply nutrients and trace elements in the correct quantity. Does this mean that you must spread separately for each element? Not if you spread Triferto Blends. You can spread all elements in one go with this unique Triferto blend concept. Using the correct ratio. Every required composition supplied worldwide.

NOVAGRAN®

●●●●●●●●●● QUALITY BLENDS

Rice

NPK 26-24-7 + 2 SO₃ + 0,05 B + 0,02 Zn with N-stabilizer

NPK 32-0-18. Application after tillering

Banana

NPK 15-5-30 + TE

Oil Palm

NPK 14-34-12+1,5 MgO+0,05 B

NPK 14-12-26+8,2 MgO+0,05 B

NPK 15-13-26+5,2 MgO+0,05 B

Triferto

Humic Acids

HUMIC Liquid 20%

Perfectly soluble in liquid fertilizers and crop protection. To be applied by all irrigation (pivot) and fertigation systems.

HUMIC Solid (85%)

The most concentrated form of humic acid available. HUMIC Solid dissolves rapidly in water (100% soluble) so it will not block your filters.

HUMICoat®

An unique coating with humic acids, a surface treatment applied to solid fertilizers which modify nutrient availability in the soil.

NPK 10-8-15 HUMICoat

NPK 15-0-15 + 0.2 B HUMICoat

NPK 17-3-17 + 2TE HUMICoat (SOP)

NP 22-18 MgO HUMICoat

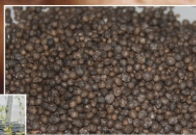

NPK 15-2-19 + SO₃ + MgO HUMICoat

**THE SOIL
PERFORMS
BETTER**

HUMIC LIQUID

HUMICoat
HUMIC Fertilizer Coating

HUMIC SOLID

Humic Acids is a soil conditioner formulated to increase the ability of soil to retain nutrients and improve water-holding capacity. Humic acids enhances the soil's ability to chelate nutrients and to promote exchange of nutrients between plants and the fertilisers being applied.

Triferto

Potassium Sulfate

NOVU-K FERTILIZER

NOVU-K is an unique fertilizer because of its multiple content of nutrients, Potassium (14%), Calcium (17%), Magnesium (6%) and Sulfur (48%). All nutrients are present in the form of sulfate, are readily water-soluble and therefore immediately available to the plants.

NOVU-K is particularly suitable for chloride sensitive crops such as potatoes, vegetables, fruits and for crops cultivated under irrigation systems.

Triferto

Water soluble fertilizer

SOLFERTO is an hydrosoluble fertilizer with different NPK ratios. It fulfills the needs of the crops at each plant development stage. SOLFERTO can be used in fertigation systems or as foliar application due to its high solubility.

On demand formulations are possible.

Rooting / flowering initiation

SOLFERTO 10-43-10 TE

General purposes

SOLFERTO 18-18-18 TE

Generative grow

SOLFERTO 16-08-24 TE

Hardening / ripening stage

SOLFERTO 10-10-44 TE

EC FERTILIZER. NPK fertilizer low in chloride with micro-nutrients (B, Cu, Fe, Mn, Zn)

SOLFERTO

Triferto

Organic Chicken Manure

Ideal product for well-balanced agriculture.
High concentration of organic elements. Easy
to absorb by soil, stimulating root formation.
Will develop biodiversity in the soil.

NPK 4-3-3

NPK 2-4-3

NPK 4-2-10

NPK 8-3-3

Benefits of product

- Pasteurization according to European standard 1069/2009.
- Source of humus.
- Homogeneous and stable thanks to very modern drying technology.
- Traceability thanks to controlled production.
- Stimulates activity of micro-organisms in soil.
- Natural oligo-elements present : Fe, Mn, B, Mo, Zn, Cu.

fertilizer

ORGANIC CHICKEN MANURE FERTILIZER

Triferto

Granulated Lime Fertilizer

Granu-Lime

Granu-Lime is a 100% natural slow release lime fertilizer.

53% CaO - 54 Neutralizing value

- Hard granular, outdoor storage possible
- Gradual solubility, doesn't harm soil life
- Dust free, easy to handle

GRANU LIME

The most important function of lime fertilizers is to restore and maintain the soil pH. Comprehensive research has shown that an optimal soil pH results in an optimal crop yield. Consistent liming of soils is therefore crucial for a healthy crop.
