

Solid State Relays, 2-phase controlled

Zero-point switching, without heatsink

Main Characteristics:

- 2-phase control**
- Space-saving, width of only 45 mm
- LED display
- Various connection technologies
- Plug-in control terminal
- Degree of protection IP 20

Standards / Approvals:

- DIN EN 60947-4-3
- UL 508 / CSA¹
- CE / C-Tick

Ordering Key:

Switching times ON delay	ms	1 + max. one half-wave
OFF delay	ms	1 + max. one half-wave

¹ Use overvoltage protection device; max cut-off-voltage 6.000 V; min energy handling capability 100 J

² The current I_{max} provides information about the performance of the solid-state relays. The actual permitted rated operating current I_e can be smaller depending on the connection method and cooling conditions. The spring-loaded terminals version can be used for a rated current of up to approx. 20 A with one conductor and up to approx. 40 A with two conductor on each terminal.

³ Attention!

This product was constructed as an EMC Class A device. The use of this product in residential applications could lead to radio interferences. In such an application, additional filtering may be required.
