Mobile Thermal Printer

ENERGY MIRACLE FOR CONTINUOUS OPERATION

With only 300 g, the thermal printer GeBE-FLASH is a light weight. The area of application is mobile outdoor receipt or protocol printing in accounting systems, measuring technologies and logistics.

The printer is is amongst others compatible with HP Deskjet and HP 82240 B. The easy to handle printer prints on 58 mm paper width. Thanks to Easy Loading Technology changing of paper is a matter of seconds. The OnPaperDisplay-Menu (OPD-Menue®) assures clear and easy change of configuration. To aid the compact device GeBE uses a handy paper roll.

The GeBE FLASH operates directly from an app for iPhone®, iPad®, iPod® or for an Android™ Smartphone – via Bluetooth®. Do you need custom features such as your company colors or logo on the printer? GeBE is more than happy to add these features at low volumes. Additional accessories allow further customization. Available are belt pouch or a clock-module.

An innovative power management controls the energy resources efficiently which means maximum endurance. During standby operation the power draw is as low as 10 µA! Do you want to charge the battery in vehicles? Easy to be done by the 12 V car charger. The mobile usage is guaranteed by a short charging time and long runtime.

The small paper roll allows for 11 m of text, graphics or bar codes. Alternatively, self-adhesive labels can be printed with an eye-pleasing resolution of 203 dpi.

Robust and enduring for trades and industrial applications.

Compact and easy cleaning for recording in lab applications.

■ Location independent printing of essential data

■ App-based control

■ Long runtime – short charging time

■ Simple configuration

■ Time saving paper handling

■ Optional customization available starting at small production series

The model GeBE-FLASH for iOS can be tethered as an accessory to iPod®, iPhone® or iPad®. The printer will be recognized as a Bluetooth® device.

We gladly assist app customization. SDK and framework available.

Intended for design customization starting at small series production.

The GeBE-printers can be charged from a vehicle.

About GeBE

We listen
We will stay in permanent contact to come to a solution together. Reliability, fairness, trust, openness and integrity is the natural basis as to how we do business.

Products, that evolve and improve
Small thermal printers, HMI devices and keyboards of various technologies with micro-processor controlled PCBs compose our product focus. Our vast experience with OEM projects enables us to offer a flexible approach to your individual wishes and expectations. Your design – your firmware? We will make our products yours.

All from one source
Sales, development, production, support. You will receive everything from one source, starting with your first inquiry all the way to serial production. We will manufacture in-house and certify per DIN EN ISO 9001:2008, so you receive "Made in Germany" quality. Reliable, long-lasting and at fair terms.

We expand our know-how
Since 1975 we have developed input and output devices including hardware and software. We constantly apply the newest state of technology and our vast knowledge, so we can accompany you through the development of your I/O application. With answers, trainings, on your application.

You produce yourself?
Even if we do not assemble for you, we will still develop your device or product.

Industry Leading Developments

Year	Development	
2012	Intelligent HMI through use of GeBE-INDICO®-Designer GUI.	
2011	First mobile Bluetooth® printer for iPhone®, iPad® and iPod®.	
2004	First 4" panel printer as an alternative to standard DIN A4 desktop printers.	
2001	First panel printer fabricated without screws, with Easy Loading Technology.	
1997	Dot-matrix printer without fixated counter bearing for document printing.	
1994	Prescreption printer with paper turn-over unit for two-sited printing. Basic technology for GeBE-MOTION®.	
1990	First battery powered printer for mobile use.	
1989	Cassette printer with dot-matrix technology and paper cutter for thick cards.	
1985	Plotter for labeling of small signs (serial terminals).	
1974	Rotate and swivle-mounting test adapter including bridges for testing purpouses.	
1965	Instrument for measurement of hydrated layers in photographical film material.
