

GFT-Touch-2T Desktop

GFT-Touch-2T-Desktop

The GFT-2T touchpad developed out of the modular design of the GFT series, is especially suitable for extremely confined working environments.

The space saving module is 10 to 10 centimeter in size and ideal for use in cramped areas.

The touchpad is a plug-and-play device with USB interface.

Once parked, it requires no additional space for moving the mouse.

Particularly suitable for mouse input in industry, medicine, laboratory and measuring technology and engineering.

Features:

Completely closed surface, dust and splash-proof according to DIN IP65.

Good tactile feedback from metal domes.

Mechanical data
