

NOVU-K is an unique fertilizer because of its multiple content of nutrients, Potassium (14%), Calcium (17%), Magnesium (6%) and Sulfur (48%). All nutrients are present in the form of sulfate, are readily water-soluble and therefore immediately available to the plants. NOVU-K is particularly suitable for chloride sensitive crops such as potatoes, vegetables, fruits and for crops cultivated under irrigation systems.

NOVU-K

FERTILIZER

Technical Data Sheet

Chemical analysis

	Guaranteed	
Water Soluble Sulfur	48,0 %	SO ₃
Water Soluble Potassium	14,0 %	K ₂ O
Water Soluble Magnesium	6,0 %	MgO
Water Soluble Calcium	17,0 %	CaO
Chloride	3,0 %	Cl
Moisture	1,0 %	H ₂ O
Trace elements (typical)	PPM	
Iron	100	Fe
Manganese	3,8	Mn
Zinc	3,9	Zn
Boron	300	B

Physical analysis

distribution mesh size (MM)

Partical size	Range (%)
+ 5,60	1
+ 4,00	5-8
+ 2,80	50-80
+ 2,36	75-95
+ 2,00	91-99
+ 1,18	99 minimum
Bulk density	1,6 gr/cm ³
pH	Neutral
